MEMPHIS, TENN., SATURDAY, AUGUST 9, 1884.

GOV. JAMES L. ALCORN A CANDL. DATE FOR CONGRESS. It will be seen from a communication published in another column that Gov. J. L. Alcorn has been induced to become a candidate for Congress in the Mississippi Congressional district extending from the river line to Warren county. Gov. Alcorn is regarded as a better Republican than his opponent, Judge Jefferds, but he will Perhaps Fatally Injured by a Railroad receive the support of every man interested in the improvement of the great Mississippi delta. He has been brought forward by leading citizens of the "Shoe string district," irrespective of party predilections, and while he is a Republican who will act with his party in the Congress of the United States, his great talents and influence will make him the peculiar champion of the levee system, and as every man living in the Sixth Mississippi Congressional District le interested in the great object Gov. Algorn proposes to accomplish, the people would promote their great material interest by electing him by such a majority as would nerve his arm with strength in the great work he pro-poses. With Gov. Alcorn in Congress,

unanimous vote. Intellectually Gov. Alcorn has but few superiors on this continent, and his great abilities and energy of character would enable him to accomplish a work which would be an imperishable monument to his fame. As a politician, the APPEAL has warred upon Gov. Alcorn for fifteen years and still detests his polities, but as the psculfar champion of a system of levees which will protect the peoat heart the great material interests of the of liquor. No agreement has yet been

IMPORTATION OF RAGS.

Recommendation that They Show be Absolutely Prohibited. Washington, August 8.—Acting upon the information that a cargo of rags had the information that a cargo of rags had recently been passed by the State quarantine officers at the port of New York, the Secretary of the Treasury has instructed the collector of customs at that port to allow no rags to be imported unless positive proof is produced that they came from non-infected ports and are in themselves entirely free from infection. The fact that the vessel has a clean bill of health and has been given a permit to pass by local quarantine officers is not to be considered as conclusive proof of the non-infected condition of her cargo. These instructions are based on the clause These instructions are based on the claus President to excend a sum not excee \$100,000 to maintain quarantine at ports of danger and to aid State and local boards of danger and to aid State and local boards in preventing and suppressing the spread of threatened or actual epidemics. The Surgeon-General of the Marine Hospital Service has advised that the importation of rags be totally prohibited for the pres-ent at least, because, as he says, they are the companions of filth and disease, no matter from what quarter of the world they come, and so are always liable to con-yer disease.

J. HARRIS ROGERS.

Incidents in the Career of This Promising Young Scientist. Washington letter: When J. Harris
Rogers was less than nineteen years of
age, and not very long before the death of
President Henry, of the Smithsonian Institution, this learned philosopher said of
Rogers, in a letter before me, addressed
to a member of Congress, that he was the
"most original and promising of American
electricians." Subsequently, placing his
hand on the first model of Rogers's automatic telegraph, President Henry said:
"Prof. Morse never produced anything
half so ingenious or original."

This and other devices of electrical
mechanism, perfected and patented by
Rogers, are the property of the Pan-Electric Telegraph Company, of which Gen.
Joseph E. Johnston is president, and Senators Isham G. Harris, Garland and the Hon.
Casey Young are officers. The company Casey Young are officers. The company is chartered under the laws of New York, having a capital stock of \$5,000,000.

The youthful electrician has bought a massive brown stone residence on Four-

practical and valuable. All these progressive inventions inure to the advantage, and become the property of the Pan-Etectric Company. Therefore, until Blaine was nominated and Wall street collapsed, and mills and mines and banks closed their doors, and Gould's railway and other stocks became burdensome, this Pan-Electric stock was advansome, this ran-Electric stock was advanc-ing rapidly in value and the few stock-holders were becoming veritable million-aires. In fact, as speculative stock, none was worth more than this. The company owns Rogers's telephone, preferred every-where to Bell's or any other, and yet

pany having a capital of \$20,000,000, and this stock is worth from \$160 to \$180 for each share of \$100.

Mr. Rogers devised the method, employed through the past few years, of lighting the gas burners simultaneously throughout the capitol, so highly commended for cheapness and simplicity by the distinguished architect, Mr. Edward Clark. Mr. Rogers then invented the national secret telephone used by bankers and speculators in the great cities; and then was soon perfected the pan-electric then was soon perfected the pan-electric telephone, approved in Atlanta and many cities and States, and rapidly adopted and preferred everywhere, because of its cheap-ness, simplicity and fullness and clearness

I am indured to write of these facts be I am induced to write of these facts be-cause Mr. Rogers is a Tennessean, having been born and reared in Memphis, and because scientists and electricians every-where, in all parts of this country and in Paris and London & well, have expressed keen regret in numberless letters and dis-patches because of the serious, if not al-most fatal accident, which a few days ago befel Mr. Rogers. When the accident occurred by which he may be deprived of evesight, he was experimenting with eyesight, he was experimenting with mercurial vapor in order to develop and perfect an instrument named by him the telemorphe, by which he is enabled, not only to hear, but to see persons with whom he holds intercourse hundreds of miles away.

comotive; a self-adjusting burner for elec-tric lights, making them perfectly steady and of uniform intensity and brilliancy, and of uniform intensity and brilliancy, and a simple device attached to gas pipes, through which he converses with his neighbors and members of his own household. He invented the duplex circuit, by means of which two operators work six ultaneously over the same wire without a duplex. But I cannot enumerate his patready given him an ample fortune, will surely making him one of the richest, as

in the assignment of George II. Benton & Co., dealers in pipes, show their liabilities to be \$20,598; nominal assets, \$16,792; actual assets, \$6054. HOTEL ARRIVALS.

MONTEAGLE. r. Haygood Delivers a Fine Lecture

Monteagle, August 7.—This has been one of the most delightful days of the session, and the speech of Dr A. G. Haygood on public schools was the event of the day. The speaker pleaded for schools for elementary instruction supported or aided by the State, as the only adequate instrumentality for securing what the people need for their own good. What the government must have for its safety and efficiency was universal education. It was urged that university education by public taxation is non-American that the State's function is elementary adocation only. The opposition of church was who offer no substitute for of church men who offer no substitute for the public schools for the masses was vig-orously discussed. He admitted the defiiences of our own public schools and suggested remedies.

The speech was roundly applauded and well received, and at its close a very general desire was expressed to have it published in pamphlet form. Some one in the audience proposed to take up a col lection in that way, and in a few moment quite a handsome sum was received for that purpose. Live issues are discussed at Monteagle

by men of ability, and no one can tell what great results will some from such meetings as are held ere.

The programme for the remainder of the session is full of interest. The Rev. Isaac Everett of Cincinnati and the Rev Dr.

rease in value, as the Pan-Electric stock and though the State of Pennsylvania might seem, at least the properties belonging to it advance; and although the State of Pennsylvania might seem, at least view, to circumscribe its territory, its divisiond, in point of fact, must arise from every tasts in the Union in which the "Pan-Electric" and "American Postal Cumpanies" prevail; for talso owns \$2,000,000 of "The American Postal Celegraph" stock, to be pooled with a syndicate, which has already so tracted conditionally to suid 600 miles of No. 4 wires, to tap the tobacco, cotton, sagar, cattle and mineral marriets of the Southwest.

"Parthenon Heights." man histomatery, and conveyed to "The Rogers Telegraph and Telephone Company," nor would it be extravagant to predict that inventions and discoveries, giving surprising value to the stock, may here be realized under Mr. Rogers, the supervising electrician, who originated "I he National Secret Telephone" and "Pan-Electric Companies."

The Height States, and unquestionably greatlegal authority, thus refers to the subject of infringoment, and the Pan-Electric Telephone:

Dear Sin-My attention has been called to the stock of the Pan-Electric Telephone Company as an investment; I therefore desire your opinion as to whether the Telephone owned by said Company, or any part of it, is an infringement of what is known as the Bell Telephone. Respectfully,

D. K. MYERS,

DEAR SIZE In reply to your question propounded in the note hereto attached, I beg to say; I have given the subject referred to much attention, and have closely examined several opinions delivered by different courts in controversies hetween the Ball Telephone Company. Dolbear, Spencer Ghegan, and others, and I am clearly of opinion that the Pan-Electric, named by you, in no wise infringes the Bell Telephone. From the earliest decisions of our courts to the present, although inventions may in their general principles be alike, yet if in their operation and working there is an essential or material difference, there is no conflict to amount to an infringement. This is recentred in the historic case of O'Reilly ye. Norse, 15 How., U.S. Reps. 62, and in numerous decisions since that; but more clearly, and with more direct application to the matter now in hand, in Clough vs. Manufacturing Company, 105 U.S. Reps., 178 (October term United States Supreme Court, 1822.)

Without attempting any minute detail touching the inventions in question, I am satisfied—theroughly so—that the difference between them is wider and more distinct than that recognized by the court in the case 106 U.S. Reps., Sup.

The courts hold that a "Succious in departure" from a former invention is patentable without in-ringing. Dad a Stering Purpo Co., 107 U.S. 100.

Senator Harris, another eminent lawyer of the Senate of the United States, has also given the subject profound investigation from Reiss's orig-inal invention of the Telephone, in Germany, subject profound investigation from Reiss's original invention of the Telephone, in Germany, down to Drawbaugh's, Bell's and Rogers's reproduction of it in America; and beartily concurs with Judge Garland.

The judges of the Supreme Court of Pennsylvania have lately denied an injunction to the Bell Company on their broad claims; and the most eminent jurists throughout the country agree with them in the above opinion.

Thus guaranteed against infringement suits, and having secured rights in these marvelous instruments, and owning the various properties described above. "The Rogers Telegraph and Telephone Company, "Incorporated under the laws of the State of New York, April 21, 1881, was capitalized at \$5,000,000, divided into shares of \$100 each.

It is possible that the Telephone stock alone—to say nothing of "see future possibilities of Electricity," may, like that of the Bell Company, which was capitalized at \$10,000,000, rise to very high prices; but for the sake of rapid construction, and to develop the rich intres of electrical discovery already in sight, the company offers to investors and speculators very rare opportunities—for holders of this stock hold, in effect, chares of all the above stocks.
